In my article [Jean & Carl's 2016 Trip to Costa Rica](#) uploaded last in April 2016, I presented my picture of the Turrialba Volcano taken from a viewpoint on the way up the tourist highway to the top of Irazu Volcano:

Turrialba Volcano in distance from Irazu Volcano access road, February 4, 2016

Come to find out, on May 21-22, 2016 Turrialba became very active. Jean found this shot on the WWW taken from a similar but perhaps closer viewpoint than our February 4<sup>th</sup> shot:

A shot found on the WWW of Turrialba Volcano erupting on May 21-22, 2016

*Turrialba volcano erupts May 22, 2016.odt*  
*<<< add an omitted comma on January 3, 2017 >>>*
